Hundreds Claim Its Grip Broken

Do you have Arthritis? Have you a relative or friend that is suffering from this painful, distressing ailment? I came upon a simple remedy, that ended my long search and battle to rid myself of Arthritis. I had teeth pulled, tonsils out, serum shots, electric fever treatments, special built shees, hot baths, pills and salves. The Arthritis withstood them all, and examination in several of the best known clinics could detect nothing. Finally, I discovered Sulgly-Minol. Today, after seven months I am more free of pain and soreness than at any time in twenty years. Can work ten hours a day, with nothing more than tired feet. Legs, hips, back, neck and arms are practically free of pain and soreness. This has cost me

This is all I did, and all you will have to do to try Suigly-Minol. Just rub it on the soles of both feet before going to bed. A bottle will last about a month and will be enough to tell whether it will help. If it helps, keep it up for a month, and after that, just as you feel. If my feet feel sore from too much activity, I rub some on for a night or two. In my opinion, the benefits of Sulphur are more sure and complete on the soles of the feet. The results obtained have been acclaimed by many as a Godsen Often I have asked the question, "Why can't something be done to help me?" FIRST PAVED ROADS IN ALABAMA

The first paved roads in Alabama were paved with planks. This was accomplished by putting down runners and then placing the planks across them. The first Company formed for constructing such roads was the Canebrake Plank Road Company, which projected a road from Demopolis to Uniontown in 1848. The best known of the plank roads was the Montgomery South Plank Road-extending from the Capital into Lowndes County.

30 Year Fence Posts

Yes—we are now Authorized Dealers for these popular fence posts—the posts that have an average life of 30 years. And we are handling these posts, because we are convinced that they give you the most for your money-in every way. They are made from straight, sound wood—wood that has been properly seasoned, then pressure-treated (not merely dipped) with creosote. This pressure-treatment protects posts against termites and decay . . . makes them last and last. And these posts keep original size and strength at ground line; so you can replace larger untreated posts with smaller treated posts. As for appearance, these posts

really dress up your property.

Stop in and talk it over. We'll explain how much money you can save, and how much work you can avoid by setting Koppers Long-Life Fence Posts.
